

Beste Clinomics Kliënt,

Clinomics het die afgelope drie en 'n half jaar die diereteelbedryf voorsien van die mees omvattende en waarde vir geld panele om ouerskappe te bepaal en vir mutasies te toets. Ons glo dat ons 'n beduidende bydrae tot die bedryf gemaak het en vertrou dat ons ook 'n positiewe impak op u telingsbestuur gehad het.

As gevolg van die groei in ons plaaslike kommersiële besigheid, is ons opgewonde om u bekend te stel aan ZooOmics™. ZooOmics™ is 'n samewerking tussen Clinomics en inqaba biotec™, wat gebruik maak van die bestaande uitgebreide panele wat tans deur Clinomics gebruik word in kombinasie met die dienslewingskapasiteit waarvoor inqaba biotec™ bekend is.

Die samewerking sal op 1 Julie 2019 in werking tree, dit beteken dat alle monsters wat tot 28 Junie 2019 ontvang word, deur Clinomics verwerk sal word. Alle monsters in transito en afgelewer by Clinomics na hierdie datum sal na ZooOmics™ gestuur word vir analise. Intussen sal Clinomics alle prosesse en intellektuele eiendom na ZooOmics™ oordra.

Wat beteken dit vir ons kliënte? Aangesien dit 'n voortsetting van ons diens deur ZooOmics™ is, sal alle data en monsters kosteloos oorgedra word sonder enige administrasie of data kwessies. Alle monsters en data sal steeds u eiendom bly en die huidige pryse vir 2019 bly geldig. Vanaf 01 Julie 2019 moet alle monsters na die volgende adres gestuur word:

525 Justice Mahomed Straat
Muckleneuk
Pretoria

In die toekoms sal Clinomics se fokus wees op die navorsing en ontwikkeling van nuwe DNA-gebaseerde toetse van toepassing op dieregesondheid en ons samewerking met ZooOmics™ sal ons help om die nuwe toetse te kommersialiseer.

Dear Clinomics Customer,

Over the past three and a half years Clinomics has provided the Animal Breeding Industry with some of the most comprehensive and value for money panels for parentage and mutation testing. We believe that we have made a significant contribution to the industry and trust that we've also made a positive impact in the way you manage your breeding.

Due to the growth in our local commercial business we are excited to introduce you to ZooOmics™. ZooOmics is a collaboration between Clinomics and inqaba biotec™, making use of the existing extensive panels currently used by Clinomics in combination with the service delivery capacity for which inqaba biotec™ is well known.

The collaboration will become effective on 01 July 2019, which means that all samples received up to 28 June 2019 will be processed by Clinomics. All samples in transit and delivered to Clinomics after this date will be forwarded to ZooOmics™ by default. In the meantime, Clinomics will also transfer all processes and intellectual property to ZooOmics™.

What does this mean for our customers? Since this is a continuation of our service through ZooOmics™ all data and samples will be transferred seamlessly with no added admin burden or data compatibility issues. All samples and data will still be your property and the current prices are fixed for 2019. From 01 July 2019 all samples must be shipped to:

525 Justice Mahomed Street
Muckleneuk
Pretoria

In the future, Clinomics' focus will be the research and development of novel DNA-based assays applicable to the Animal Health industry and our collaboration with ZooOmics™ will assist in the commercialisation of these novel tests.
